

Software solution for calculation of heat transfer coefficients, solar radiation and light transmission coefficient

Features:

- SI Generate the declaration of performance and a CE certificate for any glazing
- SI Boundary conditions according to EN 52022-3 or freely definable
- SI Extensive data base with various products of international glass
- SI Calculations according to US standard ISO 15099/ASHRAE
- SI Calculation of reflection, transmission and absorption
- SI Values: Ug-value; g-value; gtotal-value and SHGC-value
- SI Display of the temperatures over the cross section
- SI Standards: EN410; EN673 and EN ISO52022-3
- SI Calculation of any pane constructions
- SI Import of own spectral data

**Individual
User-Friendly
Quality Assured
Intuitive Operation
Acknowledged Results**

Software for Experts

**The software
for your success!**
